Product Fact Sheet

TuneView for iPod

Connections for your Computer **1 510 222 0131**

Part #: TVI-200C MSRP: $179.99
Pro Version: $279.99

The Ultimate Remote Control for iPod

TuneView provides an easy way to connect your iPod to a stereo or TV and control the iPod throughout your house.

Used in conjunction with the TuneView dock, a TuneView remote gives users the ability to not only play/pause, adjust volume and change tracks but also to browse the contents of an iPod. It's an entirely new way to remotely manage music and video residing on an iPod.

TuneView also charges your iPod and provides a way to synchronize the iPod with iTunes running on a PC or Mac.

How It Works

Simply place your iPod in the TuneView dock and pick up the TuneView remote. The dock and remote communicate with each other via a 2.4 Ghz radio signal that works through walls.

The dock queries your iPod each time that information is needed and transmits this data to the remote. With the color LCD screen and the ten keys provided on the remote, you can quickly and easily browse your iPod and control the iPod as if it were in your hands.

For Use With

Designed for use with 4G and 5G iPods with dock connector, including iPod with video, iPod Nano, iPod with color display and iPod mini.
